PROBLEM STATEMENT

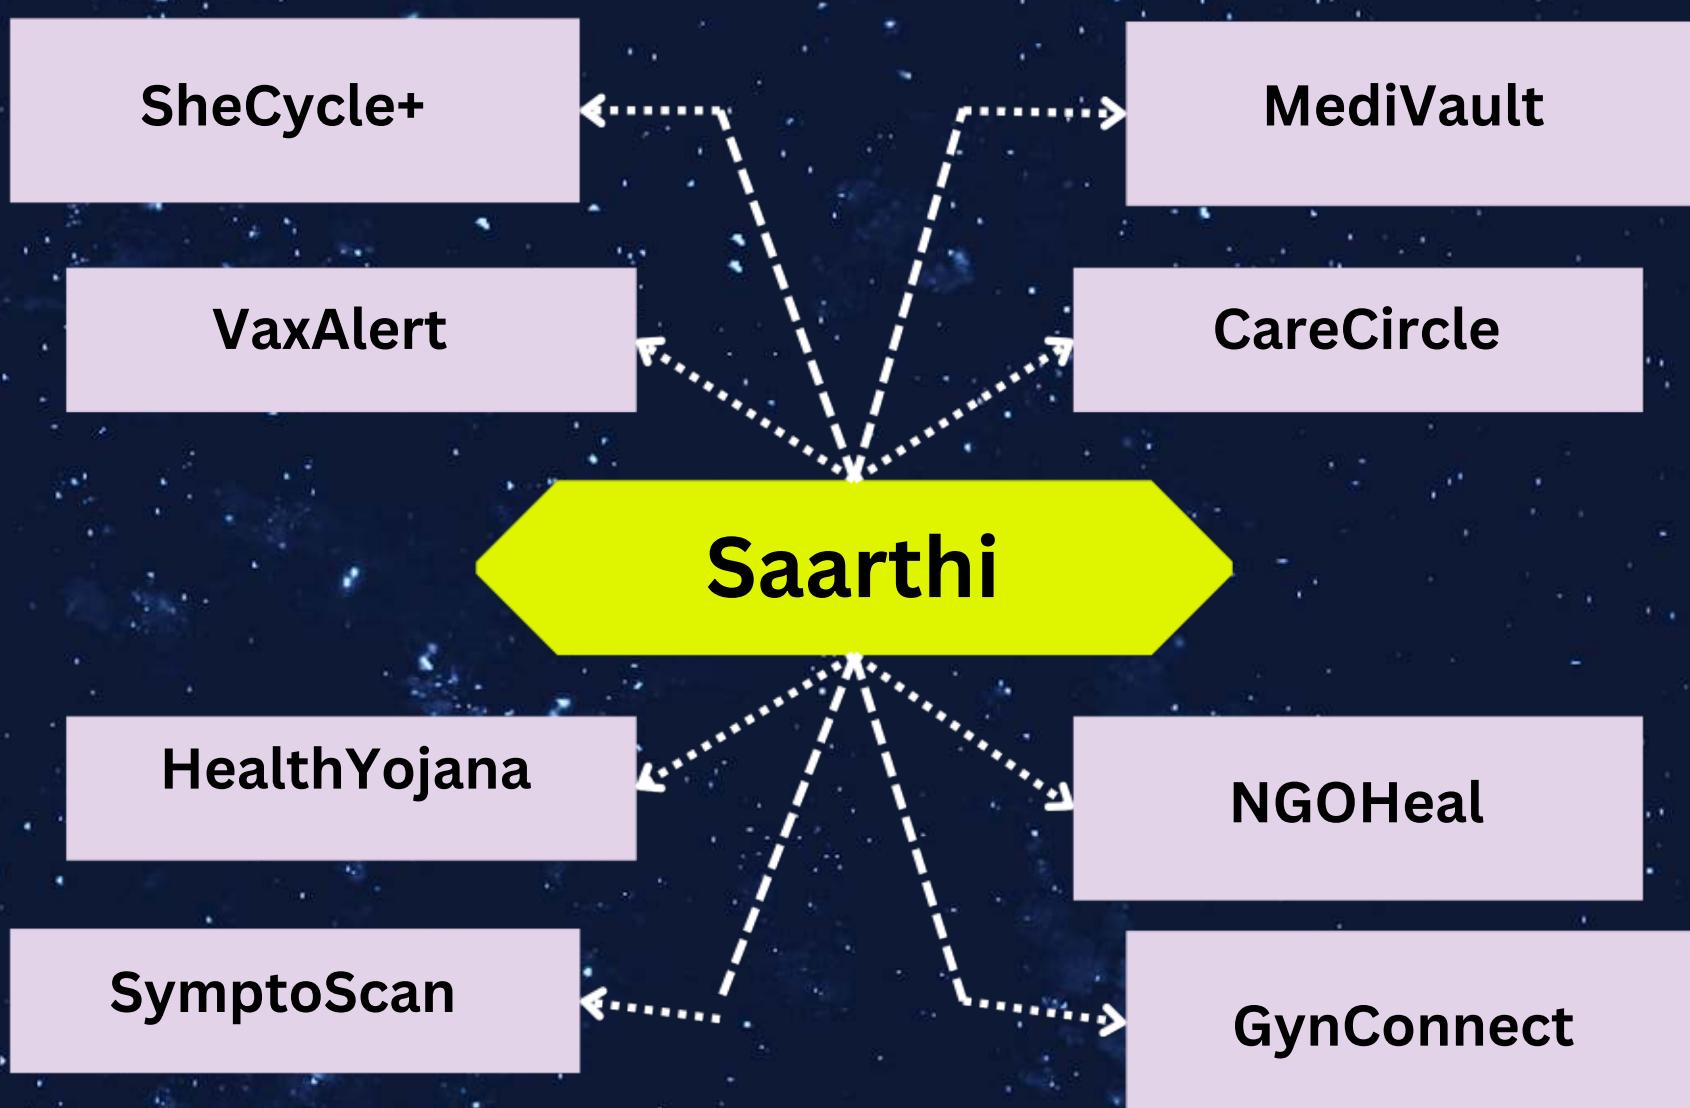

Millions of Indian women, especially in rural and semi-urban areas, face limited access to essential **healthcare**. They lack **reliable health records**, timely reminders for **periods and vaccinations**, **gynecological support**, and awareness of legal and emotional resources. These issues are worsened by poor infrastructure, language barriers, and a lack of inclusive digital solutions.

Theme
Healthcare Technology

PROPOSED SOLUTION

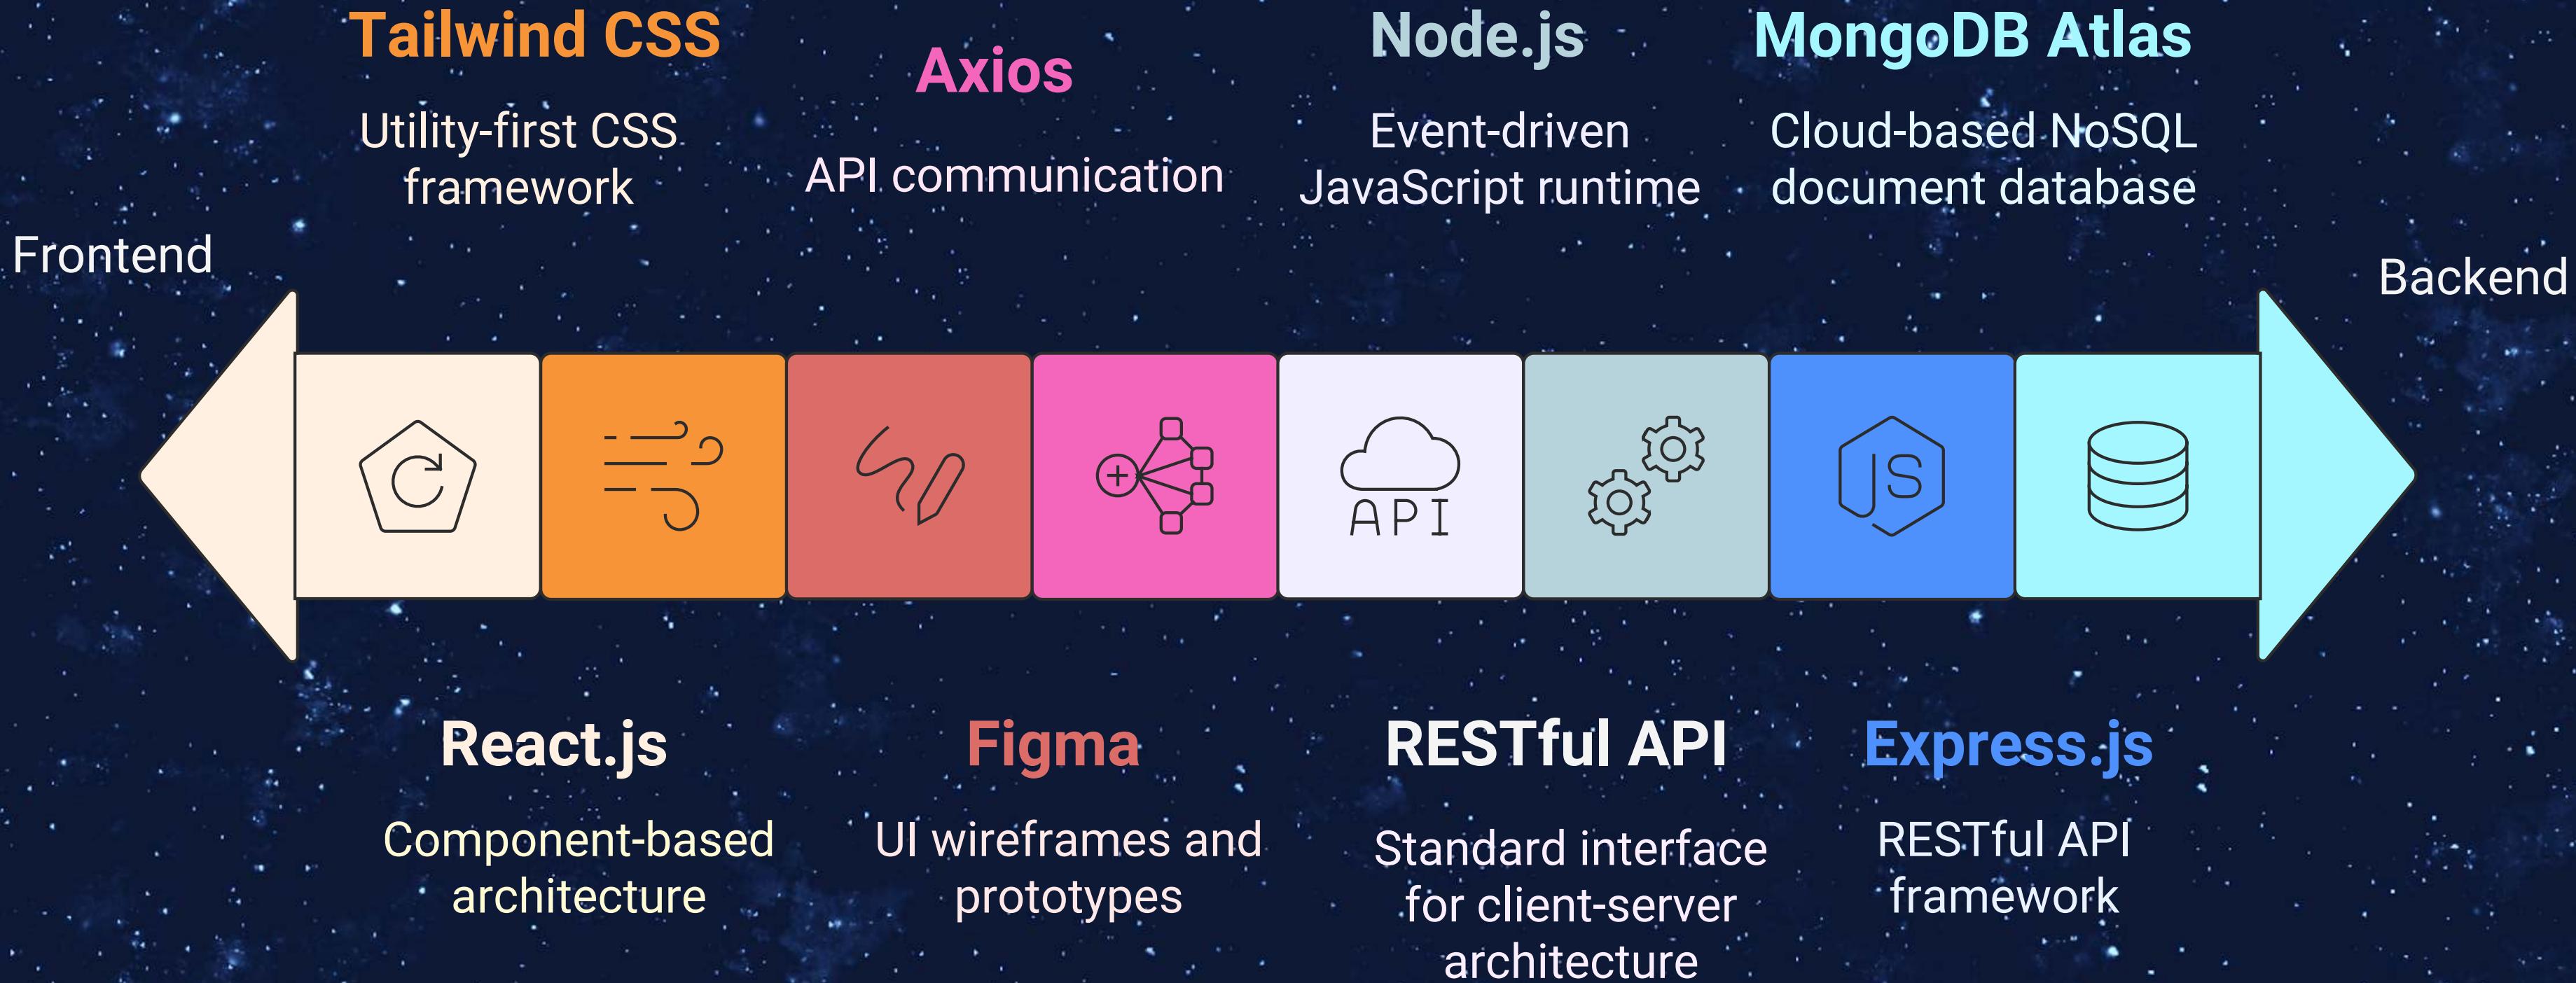

Saarathi : Guiding her to wellness

Key Features

1. **SheCycle** : Track periods, moods, symptoms & ovulation with intelligent cycle reminders.
2. **VaxAlert**: Get real-time vaccine alerts for HPV, tetanus, iron shots & health drives.
3. **HealthYojana**: Auto-match user profile with government health schemes like PMMVY, Ayushman Bharat.
4. **SympoScan**: AI-Based symptom checker for PCOS, UTI , menopause & more- in simple language,
5. **MediVault**: Secure locker for prescriptions, allergies, vaccination history & body vitals.
6. **CareCircle**: Join anonymous peer chats or consult real-time with experts (doctors, lawyers, counselors).
7. **NGOHeal**: Instantly connect with NGOs for menstrual aid, maternity help, or crisis support.
8. **GynoConnect**: Find verified gynecologists near you or consult 1:1 – no travel needed.

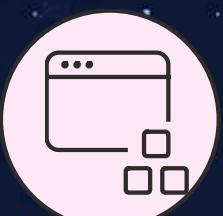

Understanding Tech stack roles from Frontend to Backend

Technology Stack Components

Frontend technologies

UI/UX development, state handling, and rendering logic. Includes React.js, Next.js and Tailwind CSS.

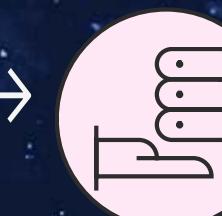

Database & Data Storage

Secure, scalable, and real-time data handling. Includes MongoDB Atlas, Mongoose ODM and Firebase Firestore.

Backend Technologies

Handling authentication, logic, and business operations. Includes Node.js, Express.js and JWT.

Integrations & APIs

Enhancing functionality with third-party tools. Includes Google Maps API, Twilio and Firebase Cloud Messaging.

Deployment, DevOps & Security

Making the platform live, secure, and maintainable. Includes Vercel/Netlify, Render/Railway/Heroku and GitHub Actions.

Authentication & Authorization, Data Privacy Compliance, Encrypted Data at Rest and in Transit.

NGOHeal

Connects users with NGOs for women's health aid

HealthYojana

Matches users with relevant government health schemes

VaxAlert

Sends vaccine reminders and health advisories

MediVault

Securely stores health records and vitals

GynConnect

Connects users with gynecologists for consultations

CareCircle

Provides community support and counseling

Landing Page

Welcomes users with login/signup options

Authentication

Ensures secure access to personalized features

Personalized Dashboard

Central hub for accessing all features

SheCycle+

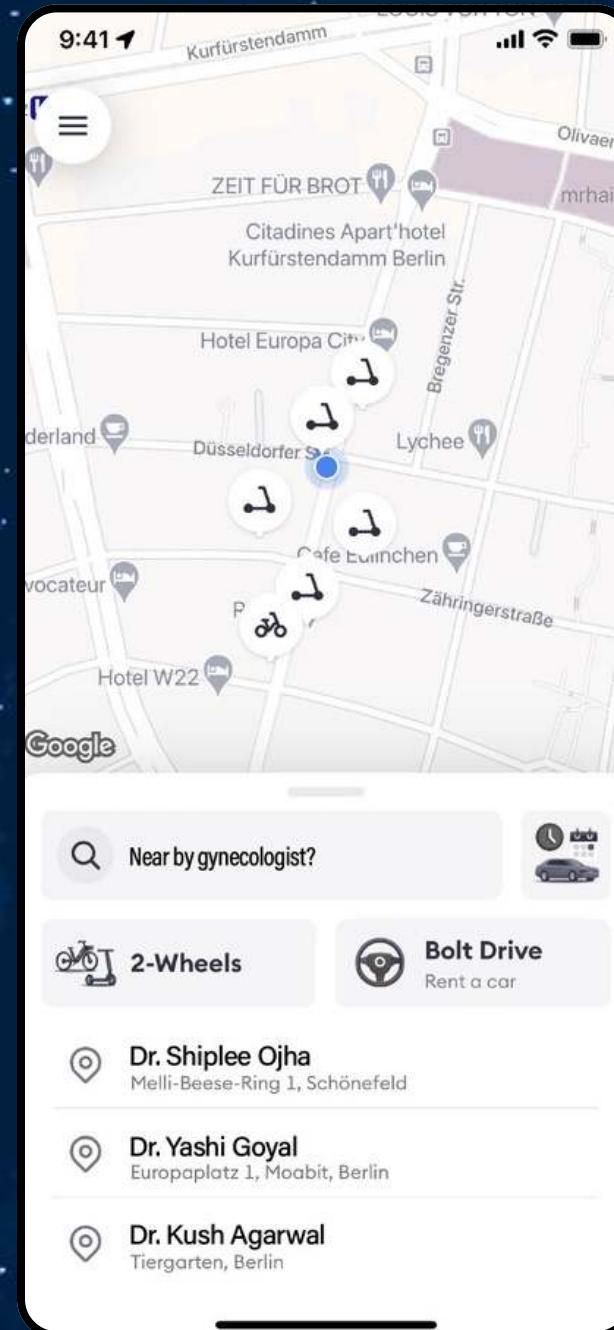

Tracks menstrual cycles and provides wellness tips

SymptoScan

Checks symptoms and offers medical advice

UI Mockup

*"Smart, Simple,
Saarthi –
Health Made
Accessible"*

The Saarthi app landing page features a header with the Saarthi logo and navigation links: About, Services, Doctors, Blog, Contacts, and Appointment. A large central image shows a group of women in traditional Indian attire. The text "Medical Your Personalized Women's Health Companion" is displayed, along with a "Get STARTED" button. To the right, there are icons for "She Cycle+", "Sympto Scan", "Gyn Connect", "Medi Vault", "Health Yojana", "Care Circle", "Vax Alert", and "NGO Heal". A "Our Features" section is also visible.

CHALLENGES AND SOLUTION

Lack of Trusted Healthcare Access

GynConnect (Online + Nearby) Verified gynecologist discovery + teleconsultation support via live chat.

Poor awareness of health conditions

Fragmented NGO Support

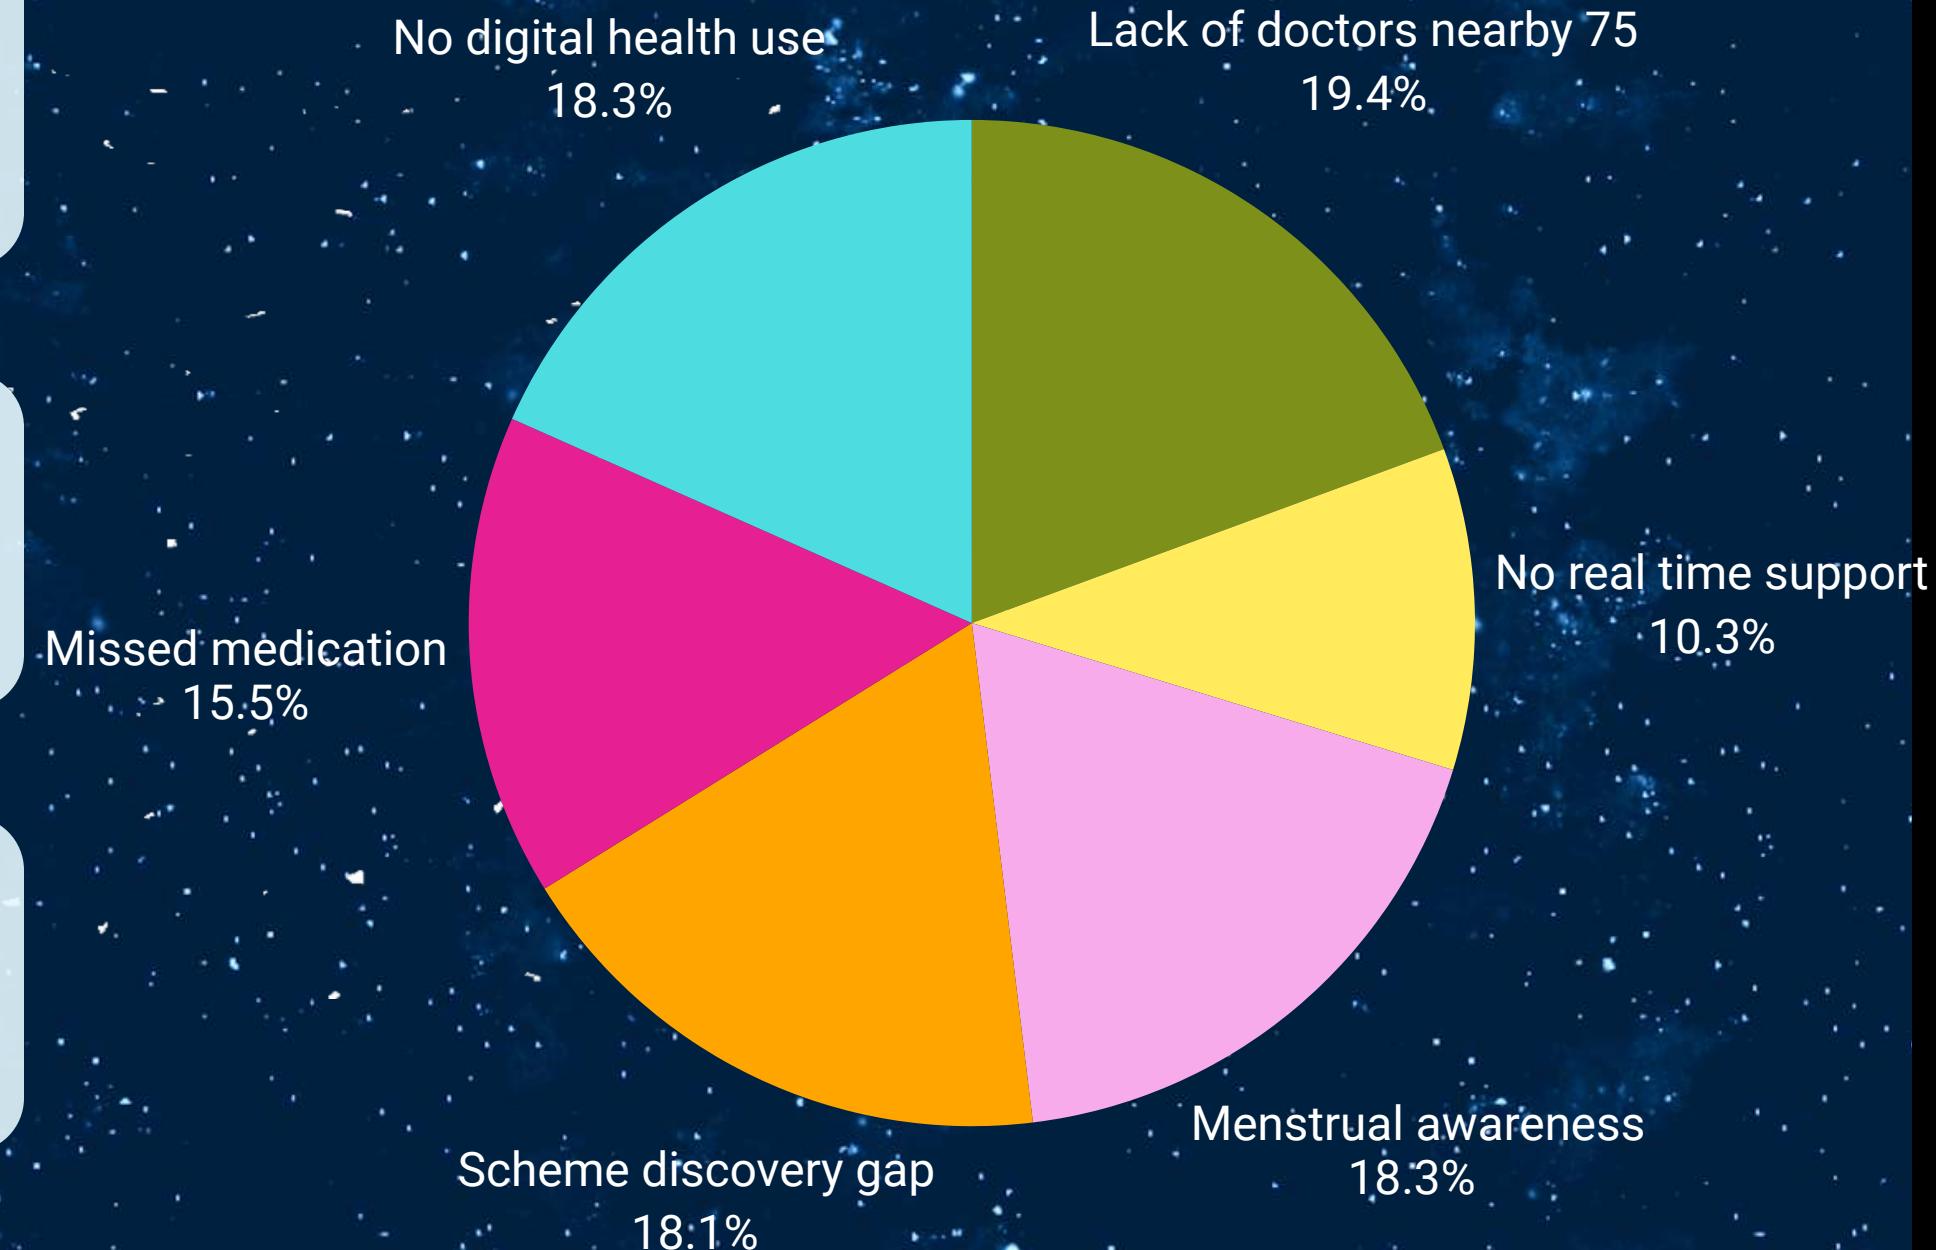

NGOHeal Directory Verified NGO contact points for shelter, medicine, or counseling.

Inapproachable Government Schemes

HealthYojana: Auto-matching with health schemes based on user profile + step-by-step application guide.

Lack of Medical History Management

MediVault:Central encrypted storage for medical reports, cycle logs, doctor notes & prescriptions.
